The Creativity in Education SIG offers an umbrella for researchers. We offer a loose umbrella for researchers, teachers, researching professionals, policy makers and practitioners in a wide variety of settings, to work together and exchange perspectives on a variety of themes pertinent to creativity in education.

**SIG: Creativities in Education**

**Objectives**
The SIG organises a number of seminars and symposia both at BERA and in a variety of university sites. Themes which are of particular interest to members are featured throughout the academic year.

**Upcoming events and initiatives**

**Exploring Contemporary Creative Practices: Within and beyond school**
This one day SIG conference will be held at the OU Camden on 22nd February. This conference will draw together academics, practitioners and other interested colleagues in order to explore the nature of current creative practices and the methods used to investigate them. Alongside presentations of current research, there will be space for discussion, connection and debate. The day will close with the third Anna Craft Memorial Lecture by Pat Cochrane of Ive.

The third International BIBACC conference will be held in Cambridge, October 2018. See www.bibacc.org in October 2017 for the Call for Papers.

**Keywords**
